ASIS

Advancing Security Worldwide®

Achieve your full potential with ASIS Board Certification

Accepted as the standard. Worldwide.

Be competitive at every stage of your career. Leverage the scope and strength of your knowledge and experience and validate your professional competencies by earning your board certification from ASIS International—the world’s preeminent organization for security professionals.

Since the establishment of the Certified Protection Professional (CPP) credential in 1977, ASIS board certification has been recognized as the standard for certification in the security profession. It is an objective means of distinguishing highly skilled security practitioners from those who claim to be by providing documented evidence of knowledge, skills, and abilities.

Invest in your future and appreciate the short and long-term rewards of certification, including expanded career prospects, increased potential for higher-level responsibility, and greater income.

Transform your certification goal into reality

While ASIS recommends several means of exam preparation for certification candidates, classroom reviews are one of the only methods that give you the significant advantage of face-to-face interaction with knowledgeable experts **and** industry peers.

In just a day and a half, experienced instructors walk you step-by-step through a review of the relevant body of knowledge. Identify areas of strength and weakness so you confidently know where you should focus your study. Network and exchange with industry colleagues to gain valuable insight into effective study techniques and resources.

IMMEDIATE BENEFITS

- Identify key vocabulary terms and learn how to apply concepts you will likely encounter on the exam.
- Better understand and build expertise in areas where you are less experienced and knowledgeable.
- Establish relationships, exchange study tips, and form study groups with others preparing for certification.
- Take a practice test—confirm your understanding of where you need to concentrate your study.
