
ASIS Academic Practitioner Symposium

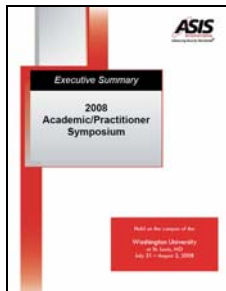

The Symposium is a forum for promoting continuing communication between security academicians and security practitioners. Participants at this invitation-only event gather annually for an intensive, multi-day program of plenary sessions, guest speakers, and dynamic breakout sessions, during which they discuss and debate industry issues and trends, and take actions geared to the advancement of security education at the baccalaureate and graduate levels. Each Symposium builds off previous years' work. Past Symposiums have resulted in course outlines, curriculum models, core competencies, and potential accreditation criteria, among other products. The 2009 Symposium takes place July 29-31 at the University of Maryland. David H. Gilmore, CPP, chairs the Symposium. The Vice Chairman is Dr. Carl T. Richards.

The Symposium is conducted in coordination with the ASIS International, Council on Academic Programs in Colleges and Universities, with funding support through the ASIS Foundation, and administrative support from the Research and Development Department at ASIS International Headquarters. The ASIS Headquarters point of contact is academicsymposiun@asisonline.org

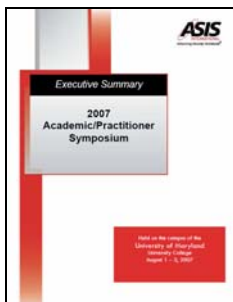

[Compendium of the ASIS Academic/ Practitioner Education Symposium, 1997-2008](#)

Details the collective findings of the 11 symposia and offers insight into the state of security education at the collegiate level.

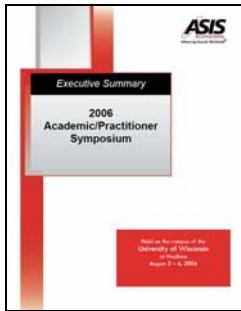

2008: Research Topics for the ASIS Foundation; Bridging the Gap Between the Security Degree and the Security Job Opportunity; Identifying Core Competencies for International Security and Information Systems Security.
