

Matrox to Showcase Advanced Security Surveillance Systems at the 55th Annual ASIS International Seminar and Exhibits

What's happening: Matrox, the industry leader in software and hardware solutions in the fields of Graphics, Video editing and Image processing, will demonstrate the new [Matrox VDA-1164](#) Video Decoding Accelerator (VDA) and [Matrox Morphis Evo](#) for the security surveillance market at the [2009 American Society for Industrial Security \(ASIS\)](#) international tradeshow.

When: Monday, September 21st - Thursday, September 24th, 2009

Where: Anaheim, California
Booth: #1177

Designed specifically for use in workstations running Video Management System (VMS) software like [Milestone XProtect™ Smart Client](#), the [Matrox VDA-1164](#) supports simultaneous decoding of up to 16 D1 video streams from a wide variety of devices, while displaying the multiple individual streams in native resolution—at full frame rate—on up to four high-definition (Quad HD) displays.

Consisting of an IP video decoder board and a full HD, quad-output board, VDA-1164 is an ideal solution for single-seat surveillance systems or in control room operator stations monitoring [large-scale IP-based security networks](#).

Developed for image capture in CCTV systems and DVRs, the [Matrox Morphis Evo](#) video capture card supports multi-channel real-time H.264 encoding. A single Matrox Morphis Evo easily captures, compresses, transmits and displays up to 16 full D1 video streams simultaneously.

Matrox Imaging hardware and [software](#) products simplify ANPR application development and costs. The [Matrox Iris GT](#) smart camera is a high-performance, single-device solution for access control and parking surveillance applications.

About Matrox Graphics Inc.

Matrox Graphics is a leading manufacturer of graphics solutions for professional markets. In-house design expertise, top-to-bottom manufacturing, and dedicated customer support make our solutions the premier choice in industries that require stable, high-reliability products. Matrox is a privately held company headquartered in Montreal, Canada. For more information, visit www.matrox.com/graphics.

About Matrox Imaging

Established in 1976, Matrox Imaging is a leading developer of component-level solutions for machine vision, image analysis, medical imaging, and video surveillance. Products include frame grabbers, vision processors, imaging computers, smart cameras, and application development software. Headquartered in Montreal, Quebec, Canada, Matrox is a privately held company with offices in the United Kingdom, Ireland, Germany, and Hong Kong. For more company information visit <http://www.matrox.com/imaging/en/about/>.
