
PREFACE

Our overall purpose for this book is to provide guidance for meeting today's security challenges on college and university campuses. Security threats have changed tremendously in the last decade. We can no longer operate as we did in the past but must change to keep students, faculty, and staff safe from evolving threats. Of course, security is not the responsibility of campus law enforcement and security officers alone. It is everyone's responsibility. As the U.S. Department of Homeland Security says, "If you see something, say something."

This book is divided into three parts. Part I covers security issues, assessments, and specific threats; Part II deals with physical security and training; and Part III addresses operational issues and solutions. There is no other book on the market today that addresses the material covered in this text.
