## PART I

### RISK MANAGEMENT: THE BASIS FOR PHYSICAL SECURITY

<b>Chapter 1. CONCEPTS IN SECURITY RISK MANAGEMENT . . . . .</b>	<b>3</b>
1.1 Taking a Strategic Risk Management Approach . . . . .	4
1.2 The Security Risk Management Process . . . . .	5
1.2.1 Considering Assets . . . . .	5
1.2.2 A Comprehensive View of the Threat . . . . .	6
1.2.3 Looking at Vulnerabilities . . . . .	6
1.2.4 Analyzing the Risk . . . . .	6
1.2.5 Protective Measures . . . . .	7
1.3 Risk Mitigation . . . . .	9
1.3.1 The Four Ds . . . . .	9
1.3.2 The Five Avenues to Address Risk . . . . .	9
1.3.3 Layered Security . . . . .	11
1.4 Mitigation Measures . . . . .	12
References . . . . .	13
<b>Chapter 2. FUNCTIONS OF PHYSICAL SECURITY . . . . .</b>	<b>15</b>
2.1 Definition and Purpose of Physical Security . . . . .	16
2.2 Functions Versus Components of Physical Security . . . . .	17
2.2.1 Structural Components . . . . .	19
2.2.2 Electronic Components . . . . .	20
2.2.3 Human Components . . . . .	21
2.3 Peripheral Systems and Interfaces . . . . .	22
References . . . . .	23
<b>Chapter 3. PLANNING AND CONDUCTING PHYSICAL SECURITY ASSESSMENTS . . . . .</b>	<b>25</b>
3.1 General Risk Assessment Models and Considerations . . . . .	26
3.2 Qualitative and Quantitative Methods . . . . .	27
3.2.1 Assets . . . . .	28
3.2.2 Evaluating Threats . . . . .	30
3.2.3 Vulnerabilities . . . . .	31
3.2.4 Risk Analysis . . . . .	31
3.2.5 Risk Mitigation . . . . .	32
3.2.6 Leveraging Outside Expertise . . . . .	33
3.3 Physical Security Assessments . . . . .	34
3.3.1 Framing the Security Survey and Putting It in Context . . . . .	34
3.3.2 Approaches to Physical Security Assessments . . . . .	36

3.4	General Guidelines—Areas to Assess . . . . .	40
3.4.1	Typical Areas and Items to Assess . . . . .	40
3.4.2	Tests . . . . .	44
3.5	Applying Assessment Results . . . . .	44
3.6	Automated Assessment Tools . . . . .	46
	References . . . . .	47
<b>Chapter 4. MEASURING EFFECTIVENESS: CONCEPTS IN PHYSICAL SECURITY METRICS . . . . .</b>		<b>49</b>
4.1	Understanding Metrics . . . . .	50
4.1.1	Benefits of a Security Metrics Program . . . . .	50
4.1.2	Designing a Metrics Program . . . . .	50
4.2	Physical Security Metrics . . . . .	54
4.2.1	Physical Security Systems Metrics . . . . .	54
4.2.2	Physical Security Personnel Metrics . . . . .	60
4.2.3	Physical Security Compliance Metrics in the Public Sector . . . . .	64
4.2.4	Presenting Aggregate Status for Physical Security Metrics . . . . .	65
4.3	Additional Recommended Metrics . . . . .	66
4.4	Application of Metrics Throughout This Book . . . . .	67
	References . . . . .	69

## PART II

### DESIGN PRINCIPLES AND PRACTICES

<b>Chapter 5. BASIC DESIGN CONCEPTS . . . . .</b>		<b>73</b>
5.1	Design Principles . . . . .	74
5.1.1	Point Versus Area Security . . . . .	75
5.1.2	Conflict Avoidance . . . . .	75
5.1.3	Balance . . . . .	75
5.1.4	Additional Design Elements . . . . .	77
5.2	Examples of Design Practices: Good and Not So Good . . . . .	80
	References . . . . .	87
<b>Chapter 6. INFLUENCING FACTORS IN PHYSICAL SECURITY DESIGN . . . . .</b>		<b>89</b>
6.1	Characteristics of the Assets under Protection . . . . .	90
6.2	Characteristics of the Building or Facility . . . . .	91
6.2.1	Ownership and Occupancy . . . . .	91
6.2.2	Purpose of the Facility . . . . .	92
6.2.3	Access . . . . .	92
6.3	Characteristics of the Surroundings . . . . .	93
6.4	Characteristics of the Location . . . . .	93
6.5	Additional Influencing Factors . . . . .	94
6.5.1	Selecting Mitigation Options Based on Influencing Factors . . . . .	94
	References . . . . .	96

<b>Chapter 7. SECURITY ARCHITECTURE AND ENGINEERING</b> . . . . .	97
7.1 Design Overview . . . . .	99
7.2 Codes and Regulations . . . . .	99
7.3 Project Requirements . . . . .	100
7.4 Type of Construction. . . . .	101
7.5 Site Layout . . . . .	102
7.5.1 Perimeter . . . . .	102
7.5.2 Lighting. . . . .	103
7.5.3 Building Design Against Blast . . . . .	103
7.5.4 Building Access . . . . .	105
7.6 Material Selection . . . . .	106
7.6.1 Building Structure . . . . .	106
7.6.2 Facades . . . . .	107
7.6.3 Interior Layout . . . . .	107
7.6.4 Glazing . . . . .	108
7.7 Site Utilities . . . . .	110
7.7.1 HVAC. . . . .	110
7.7.2 Emergency Power . . . . .	111
7.7.3 Other Utilities. . . . .	112
7.8 Life Safety Systems. . . . .	112
7.8.1 Evacuation . . . . .	113
7.8.2 Shelter-in-Place . . . . .	114
7.9 Publications Relevant to Security Architecture and Engineering . . . . .	115
References . . . . .	117
<b>Chapter 8. INTEGRATED SECURITY AND PROTECTION STRATEGIES</b> . . . . .	119
8.1 Integrated Electronic Security Systems . . . . .	121
8.2 Integrated Physical Security Elements . . . . .	122
8.3 Integrated Security Programs . . . . .	123
8.4 Integration in Enterprise Risk Management. . . . .	125
References . . . . .	129

### PART III

#### PHYSICAL SECURITY AND PROTECTION STRATEGIES

<b>Chapter 9. STRUCTURAL SECURITY MEASURES</b> . . . . .	133
9.1 Barriers. . . . .	134
9.1.1 Walls . . . . .	134
9.1.2 Doors . . . . .	135
9.1.3 Windows and Other Openings . . . . .	138
9.1.4 Roofs and Floors . . . . .	141
9.1.5 Fencing and Perimeter Walls. . . . .	142
9.1.6 Blocking Barriers . . . . .	151
9.1.7 Symbolic and Natural Barriers . . . . .	159
9.2 Containers and Vaults . . . . .	160
9.2.1 Safes . . . . .	160

9.2.2	Vaults . . . . .	164
9.3	Locks and Locking Mechanisms . . . . .	168
9.3.1	Mechanical Locks . . . . .	169
9.3.2	Electrified Locking Mechanisms . . . . .	173
9.3.3	Designing Security Locking Systems . . . . .	176
9.4	Lighting and Security Applications . . . . .	179
9.4.1	Types of Lighting Equipment and Lamps . . . . .	179
9.4.2	Lighting Challenges . . . . .	182
9.4.3	Characteristics of Light and Lighting . . . . .	185
9.4.4	Overview of Lighting Systems . . . . .	188
9.4.5	Economic Considerations . . . . .	189
9.4.6	Starting and Restrike . . . . .	190
9.4.7	Security Lighting for Selected Applications . . . . .	191
9.4.8	Lighting Considerations for Electronic Surveillance Systems . . . . .	192
9.4.9	Standards for Security Lighting Levels . . . . .	193
	References . . . . .	195
 <b>Chapter 10. CRIME PREVENTION THROUGH ENVIROMENTAL DESIGN . . . . .</b>		<b>197</b>
10.1	Principles of CPTED . . . . .	198
10.1.1	Criminal Behaviors and Patterns . . . . .	200
10.1.2	Later Developments in CPTED . . . . .	203
10.2	Tools of CPTED . . . . .	206
10.2.1	Tools That Address the Three Elements of CPTED . . . . .	206
10.2.2	Reducing Crime Through Architectural Design . . . . .	209
10.2.3	Access Control, Surveillance, and Territorial Reinforcement . . . . .	211
10.3	CPTED Applications in Various Settings . . . . .	214
10.3.1	Commercial Office Buildings . . . . .	214
10.3.2	Industrial Buildings and Facilities . . . . .	219
10.3.3	Parking Facilities . . . . .	220
10.3.4	Schools . . . . .	225
10.3.5	Automated Teller Machines (ATMS) . . . . .	228
10.3.6	U.S. Federal Buildings . . . . .	231
10.4	Integration of CPTED and Traditional Security . . . . .	233
10.5	One Example of a CPTED Survey Template . . . . .	234
	References . . . . .	240
 <b>Chapter 11. ELECTRONIC SECURITY SYSTEMS . . . . .</b>		<b>241</b>
11.1	Access Control Systems . . . . .	241
11.1.1	Personnel Access Control . . . . .	242
11.1.2	Locks . . . . .	249
11.2	Contraband Detection . . . . .	266
11.2.1	Metal Detectors . . . . .	266
11.2.2	Package Search . . . . .	268
11.2.3	Explosives Detection . . . . .	269
11.2.4	Chemical and Biological Agent Detection . . . . .	275
11.3	Physical Intrusion Detection Systems . . . . .	276
11.3.1	Performance Characteristics . . . . .	276
11.3.2	Standards . . . . .	279
11.3.3	Exterior Sensors . . . . .	284
11.3.4	Interior Sensors . . . . .	299

11.4	Video Surveillance. . . . .	315
11.4.1	Functional Requirements . . . . .	316
11.4.2	Theory of Visual Security . . . . .	317
11.4.3	Uses of Video Subsystems in Security . . . . .	318
11.4.4	Analog System Components . . . . .	320
11.4.5	Digital System Components . . . . .	322
11.4.6	System Design. . . . .	324
11.4.7	Equipment Selection . . . . .	334
11.4.8	Additional Design Considerations for Video Assessment . . . . .	343
11.4.9	Evaluation of Video Assessment Systems . . . . .	349
11.4.10	Maintenance . . . . .	351
11.4.11	Future of Video Surveillance Systems . . . . .	351
11.5	Communications and Annunciation Systems . . . . .	352
11.5.1	AC&D Attributes . . . . .	352
11.5.2	Alarm Communication Subsystem . . . . .	353
11.5.3	Security Communications . . . . .	355
11.5.4	Alarm Control and Display . . . . .	371
11.6	Trends and Issues in Electronic Systems Integration . . . . .	377
	References . . . . .	379

**Chapter 12. SECURITY OFFICERS AND THE HUMAN ELEMENT . . . . . 381**

12.1	Security Officer Utilization Growth . . . . .	382
12.2	Contemporary Challenges . . . . .	383
12.3	Determining the Need for a Security Force . . . . .	384
12.4	Security Force Models. . . . .	385
12.5	Basic Security Officer Functions . . . . .	386
12.5.1	Access Control. . . . .	387
12.5.2	Patrol . . . . .	387
12.5.3	Inspection . . . . .	388
12.5.4	Monitoring . . . . .	388
12.5.5	Emergency Response . . . . .	388
12.5.6	Traffic Control . . . . .	389
12.5.7	Dealing with Disturbed People . . . . .	389
12.5.8	Escort . . . . .	390
12.5.9	Special Assignments. . . . .	390
12.5.10	Record Keeping . . . . .	390
12.6	Security Officer Roles . . . . .	392
12.6.1	Public Relations/Management Representative . . . . .	392
12.6.2	Intelligence Agent . . . . .	392
12.6.3	Enforcement/Compliance Agent . . . . .	393
12.6.4	Legal Consultant . . . . .	393
12.6.5	Physical Security Specialist . . . . .	394
12.7	Uniforms and Equipment . . . . .	394
12.7.1	Weapons . . . . .	395
12.8	Security Officer Selection . . . . .	398
12.8.1	ASIS Guideline PSO-2010 . . . . .	398
12.8.2	Canadian General Standards Board CAN/CGSB-133.1-99 . . . . .	400
12.8.3	Personal Attributes . . . . .	400
12.9	Security Officer Training . . . . .	402
12.9.1	Key Training Concepts . . . . .	403

12.9.2	Benefits of Training . . . . .	406
12.9.3	Identifying Training Requirements . . . . .	406
12.9.4	Methods of Training . . . . .	411
12.9.5	The Training Process . . . . .	413
12.9.6	Obstacles to Providing Training . . . . .	414
12.9.7	Training Strategies . . . . .	417
12.10	Managing the Security Officer Force . . . . .	421
12.10.1	Personnel Requirements . . . . .	421
12.10.2	General, Post, and Special Orders . . . . .	421
12.10.3	Scheduling . . . . .	423
12.10.4	Supervision . . . . .	425
12.10.5	Quality Assurance and Quality Control . . . . .	427
12.10.6	Quality Control Inspections . . . . .	428
12.10.7	Management Use of Data . . . . .	428
12.10.8	Enhancing Job Performance . . . . .	429
12.11	Leveraging the Human Element . . . . .	430
	References . . . . .	432

## PART IV

### MANAGING PHYSICAL SECURITY PROJECTS AND PROGRAMS

Chapter 13.	<b>PRINCIPLES OF PROJECT MANAGEMENT . . . . .</b>	<b>437</b>
Chapter 14.	<b>PLANNING AND PREPARATION . . . . .</b>	<b>443</b>
14.1	System Design Principles . . . . .	443
14.2	Initial Phases . . . . .	445
14.3	Design Phases . . . . .	449
14.3.1	Development of Design Criteria . . . . .	449
14.3.2	Basis of Design . . . . .	452
14.3.3	Conceptual Design . . . . .	453
14.3.4	Design and Documentation . . . . .	455
14.3.5	Specifications . . . . .	456
14.3.6	Drawings . . . . .	458
14.3.7	Design Coordination . . . . .	463
14.4	Contracting . . . . .	464
14.4.1	Initial Budget . . . . .	464
14.4.2	Estimation Considerations . . . . .	465
14.4.3	Types of Cost Estimates . . . . .	466
14.4.4	Life-Cycle Cost . . . . .	467
14.4.5	Sample Estimate . . . . .	468
14.5	The Role of Consultants . . . . .	469
14.6	Video Systems . . . . .	470
14.6.1	The First Evolution: Analog to Digital . . . . .	470
14.6.2	The Second Evolution: Standard Resolution to Megapixel . . . . .	472
14.6.3	Processed Video, Video Analytics, and Intelligent Video . . . . .	473
14.6.4	Video Systems Integration . . . . .	474
14.7	Merging Legacy Systems . . . . .	476
14.7.1	Access Control Systems . . . . .	477
14.7.2	Legacy Video Systems . . . . .	482

14.7.3	Legacy Intercom Systems . . . . .	484
14.7.4	Security Networks and Legacy Integration . . . . .	485
14.8	Procurement . . . . .	487
14.8.1	Procurement Forms . . . . .	487
14.8.2	Procurement Process . . . . .	489
<b>Chapter 15. PROJECT IMPLEMENTATION . . . . .</b>		<b>491</b>
15.1	Site Preparation . . . . .	492
15.2	Contractor Coordination . . . . .	492
15.3	Installation . . . . .	493
15.3.1	Installation and Operation . . . . .	493
15.3.2	Component Installation . . . . .	493
15.3.3	Other Features and Considerations . . . . .	497
15.3.4	Tuning the System . . . . .	501
15.3.5	Maintaining the Operating Procedures . . . . .	502
15.4	Testing and Warranty Issues . . . . .	504
15.4.1	Predelivery or Factory Acceptance Testing . . . . .	505
15.4.2	Site Acceptance Testing . . . . .	506
15.4.3	Reliability or Availability Testing . . . . .	507
15.4.4	Post-Implementation Testing . . . . .	509
15.4.5	Warranty Issues . . . . .	509
15.5	Training . . . . .	510
15.5.1	General Training Requirements . . . . .	510
15.5.2	Training Topics . . . . .	511
References	. . . . .	513
<b>Chapter 16. FOLLOW-ON AND SUPPORT ACTIVITIES . . . . .</b>		<b>515</b>
16.1	Maintenance . . . . .	516
16.1.1	Remedial Maintenance . . . . .	517
16.1.2	Preventive Maintenance . . . . .	522
16.2	Evaluation . . . . .	523
16.3	Replacement . . . . .	524
<b>APPENDICES . . . . .</b>		<b>525</b>
A.	Key Terms and Definitions . . . . .	527
B.	Physical Security and Life Safety Considerations in High-Rise Buildings . . . . .	533
<b>INDEX . . . . .</b>		<b>561</b>

## TABLE OF FIGURES

1-1	Risk Management . . . . .	5	7-6	Effects of Building Shape on Air Blast Loading Pressure Effects on a Structure . . . . .	104
1-2	The Four Ds . . . . .	9	7-7	Security Zones . . . . .	105
2-1	Relationship of Physical Security Concepts, Functions, and Measures. . . . .	18	7-8	Effects of Progressive Collapse on Khobar Towers . . . . .	106
3-1	Comparative Perspectives on Topics to Consider in a Security Survey . . . . .	36	7-9	Performance Conditions for Window System Response . . . . .	108
3-2	SWOT Analysis Diagram . . . . .	39	7-10	Protecting Intakes for HVAC Systems . . . . .	111
4-1	Enterprise Performance Framework . . . . .	52	8-1	Survey Responses on Security Involvement in Nonsecurity Risks . . . . .	125
4-2	Total Forced Doors by Week . . . . .	56	9-1	Typical Chain Link Security Fence Installation . . . . .	144
4-3	Total Forced Doors and Turnstiles by Week . . . . .	57	9-2	Typical Sizes of Wire and Mesh . . . . .	148
4-4	Forced Door Details by Location and Week . . . . .	58	9-3	Decorative Fencing in Concert with a Masonry Wall and Landscaping . . . . .	148
4-5	Total Held Open Doors by Week . . . . .	59	9-4	Decorative Fencing with Top Barbs . . . . .	149
4-6	Total Unauthorized Access Attempts by Type and Week . . . . .	59	9-5	Layout of Cable Fencing Used in Conjunction with Planting . . . . .	149
4-7	Contractor Response Time by Completion Status and Month . . . . .	61	9-6	Cross-Section View of Typical Bollard . . . . .	153
4-8	Actual Contractor Response Time by Completion Status and Month . . . . .	61	9-7	Cross-Section View of a Retractable Bollard . . . . .	154
4-9	Metrics Summary Chart . . . . .	65	9-8	Decorative Security Fencing with Supporting Bollards Spaced 1.5-3 ft. (0.5 to 0.9 m) Apart . . . . .	154
5-1	HVAC/Environmental Control Systems at High-Tech Facilities . . . . .	77	9-9	Barrier Protection Ratings . . . . .	155
5-2	Design Features of a Professional Office Campus . . . . .	80	9-10	Wedge Barriers . . . . .	156
5-3	Stylish Way to Segregate a Generator and Loading Dock . . . . .	82	9-11	Installation of a Rising Wedge Barrier . . . . .	157
5-4	A Unique Terrain-Based Approach to Standoff . . . . .	82	9-12	Typical Rotating Edge Barrier . . . . .	157
5-5	A Good Practice: Separating Shipping and Receiving . . . . .	83	9-13	Custom Security Planter Barriers Installed in an Urban Professional Area . . . . .	158
5-6	Inefficient Placement of Surveillance Cameras . . . . .	83	9-14	Planter Barriers Installed in a Sports Arena Setting with Logos . . . . .	158
5-7	First-Floor Office Lobby Using Compartmentation . . . . .	84	9-15	Cutaway of a Planter with an Interior Highway-Type Barrier . . . . .	158
5-8	Bollards...Protecting Half of a Driveway . . . . .	85	9-16	Jersey Barriers . . . . .	159
7-1	Castel dell'Ovo, Naples, Italy . . . . .	98	9-17	Equivalent Pre-1972 and Current Classification Labels for Fire-Resistant Safes . . . . .	161
7-2	Castel Nuovo, Naples, Italy . . . . .	98	9-18	Summary of UL Designations and Labels for Fire-Resistant Containers . . . . .	163
7-3	Häme Castle, Hämeenlinna, Finland . . . . .	98	9-19	Lighting Straight Down . . . . .	183
7-4	Considerations in New Construction versus Retrofit/Renovation . . . . .	101			
7-5	Blast Pressure Effects on a Structure . . . . .	104			

9-20	Appropriate Overlap Versus Coverage Gap for Pole-Mounted Outdoor Lighting . . . .	184	11-8	Simplified Time Division Multiplex System	359
9-21	Natural and Visual Light Levels . . . . .	185	11-9	Frequency Inverter . . . . .	369
9-22	Reflectance Measurements . . . . .	186	11-10	Band Splitter . . . . .	369
9-23	Color Temperature . . . . .	187	11-11	Placement of Operator Controls in an AC&D Console . . . . .	372
9-24	Color Rendition Index for Various Lamp Types . . . . .	188	12-1	Uniforms and Equipment . . . . .	395
9-25	Lamp Starting and Restrike Times . . . . .	190	12-2	Employment Screening Criteria . . . . .	399
9-26	Guidelines for Minimum Lighting Levels .	194	12-3	Training Criteria . . . . .	408
10-1	Tool for Evaluating CPTED 3-D Factors . .	204	12-4	Recommended Training Topics . . . . .	409
10-2	Signage to Clarify Procedures . . . . .	207	14-1	System Design Process . . . . .	444
10-3	Typical Elevator Lobby . . . . .	208	14-2	Requirements Analysis . . . . .	448
10-4	Berm and Tree Line for Perimeter Control and Privacy . . . . .	208	14-3	Countermeasures Development Table . .	454
10-5	Access and Hours . . . . .	215	14-4	Typical Floor Plan . . . . .	459
10-6	Layouts to Avoid. . . . .	225	14-5	Typical Drawing Device Symbology . . . .	460
11-1	Bistatic Microwave Sensors . . . . .	289	14-6	Security Door Elevation . . . . .	461
11-2	Glass Break Sensor . . . . .	302	14-7	Sample Riser Diagram . . . . .	462
11-3	Shape of Microwave Detection Zone . . . .	305	14-8	Sample Door Schedule . . . . .	462
11-4	Network Types and Required Transmission Media. . . . .	331	14-9	Sample Camera Schedule . . . . .	463
11-5	Common IP Resolutions . . . . .	339	14-10	Sample Cost Estimate Format (Circa 2007)	466
11-6	Multiplexing on a Pair of Wires . . . . .	358	14-11	Sample Estimate . . . . .	468
11-7	Elements of Multiplexing . . . . .	359	B-1	Typical High-Rise . . . . .	545
			B-2	Fresh Air Intake Protection Scheme . . . .	552
