Member, CISO Council, ISSA 2002-present

Member, ISACA 2002-present

Member, DRII 2013-present

### **Based on the ASIS International Strategic Plan what three goals do you feel are the most critical to the Society over the next three years and why?**

**Global Network:** As revealed in the global member study conducted in 2014/15 it is imperative that we continue to change the DNA of ASIS to be more inclusive, less domestic and with laser focus on initiatives that serve the needs of our members at large, regardless of their residency. I hope to have the opportunity to keep the association on track with this crucial strategic initiative.

**Knowledge & Learning:** The association must assess and define the most effective, efficient, and cost beneficial methodologies of communication and educational opportunities for the global members of ASIS. Moving our ever-changing content to a digital and on-demand medium is of the utmost priority; simply put, it's 2017, this migration must happen.

Branding: The ongoing initiative to identify the name and branding dynamics which will determine how best to position the association to better appeal to both domestic and international potential members is a lofty but completely achievable goal. It is imperative for the board and staff to move the association from a North American-Centric organization to one more globally focused and relevant.

**Please describe your specific view of the role of a member of the Board of Directors.**

The role of the board is to ensure the strategic initiatives are relevant, achievable and that the subsequent plan is effectively implemented by staff and volunteer members.

**What professional efforts and accomplishments within ASIS and outside (not simply roles you have held) make you deserving of this candidacy?**

I believe my time as a volunteer within the security profession and industry at large speaks for itself. Hopefully, my peers will see fit for me to continue serving the membership of the association.
