

Experience **PLEASE NOTE**

Show the progressive history of your security career, documenting the years of experience required for certification.

List each full-time assignment, beginning with your present position. Complete information is required; job title alone is not sufficient. Summarize each assignment, giving sufficient detail to signify the nature of the decisions you were required to make, and additional duties required by the position.

CPP Security Management Experience: Professional protection experience must include a minimum of nine (9) years of security experience, with at least three (3) years in responsible charge² of a security function OR seven (7) years of security experience, with at least three (3) years in responsible charge of a security function when applying with an earned bachelor's degree or higher from an accredited institution of higher education. Part-time or secondary positions do not meet the experience or responsible charge requirements.

PCI Professional experience in investigations: Account for a minimum of five (5) years of investigations experience, with at least two (2) years in case management.

PSP Professional experience in physical security: Account for a minimum of five (5) years of physical security experience.

¹Experience is defined as the individual having been personally engaged in security or loss prevention on a full-time basis, or as a primary duty. Included is:

- Experience as a security professional in the protection of assets, in the public or private sector, criminal justice system, government intelligence, or investigative agencies.
- Experience with companies, associations, government, or other organizations providing services or products, including consulting firms, provided the duties and responsibilities substantively relate to the design, evaluation, and application of systems, programs, or equipment, or development and operation of services, for protection of assets in the private or public sectors.
- Experience as a full-time educator on the faculty of an accredited educational institution, provided the responsibilities for courses and other duties relate primarily to knowledge areas pertinent to the management and operation of protection of assets programs in the public or private sectors.

²Responsible charge is defined as the charge exercised by an individual in a management position who makes decisions for the successful completion of objectives without reliance upon directions from a superior as to specific methods. However, an applicant need not have held a supervisory position, as long as the positions on which the application relies have specifically included responsibility for independent decisions or actions. If "responsible charge" is not based on supervisory responsibilities, then security program management responsibilities and duties must be clearly shown. Generally, this excludes such positions as patrol officer or the equivalent.

³Physical security is defined as the various physical measures designed to safeguard personnel, property, and information.
