J. Kelly Stewart, MBA, CHS-IV, CFC, CAS

Managing Principal & CSO

Newcastle Consulting, LLC

Leesburg, Virginia

J. Kelly Stewart, MBA, CHS-IV, CAS, is the Managing Principal and CSO for Newcastle Consulting, LLC - an Enterprise Risk and Strategic Security Design Management Consultancy. He brings 25 years of public and private experience in leading multi-national security risk management operations and complex physical security programs for Fortune 500 and 1000 companies, government entities and educational institutions. His expertise concentrates on developing and executing security strategies in support of overall organizational resiliency and focus on recommending holistic security programs that add value to the overall corporation. He is a key leadership advisor and business partner enabling executives to focus their organizations on core competencies where they can achieve definable advantages and add value to their client base thus facilitating and protecting strategic advantages they have in the marketplace.

Mr. Stewart served a distinguished tenure with the United States Secret Service coordinating advance operations with law enforcement representatives in the areas of intelligence information, threat identification and planning, and emergency evacuation operations as well as completing multiple advances for the President and first family trips. He has been a key advisor to the Chief of Defense Nuclear Security on matters of security policy and special projects, concentrating on physical security systems design and operations, vulnerability assessments, technology applications and security management. He has further managed teams assessing, evaluating, and implementing anti-terrorism and force protection improvements for high asset targets within the Departments of Energy, Defense and Homeland Security as well as the National Nuclear Security Administration (NNSA), while simultaneously assembling a team of top security experts from diverse backgrounds to advise Government leadership on implementation of a graded security protection policy and application of the Design Basis Threat.

Mr. Stewart holds three Master's degrees (MA, Security Management – Webster University; MA, Project Management & MBA, International Business – Keller Graduate School of Management). He is Board Certified as a Homeland Security Professional, an Anti-Terrorism Specialist and as a Forensic Consultant. He is Chair of ASIS Security Architecture & Engineering Council and Vice-Chair of the Critical Infrastructure Working Group (CIWG).

He is a frequently requested lecturer and speaker in the areas of Risk, Threat & Vulnerability Assessment; Facility Security Design; Security Program Development and Management; Enterprise Security Risk Management; Organizational Resilience/Crisis Management; Cyber Security/Information Assurance; Threat Intelligence Acquisition & Analysis; overall Physical Security; Executive Protection; Industrial Security; Security Education, Training, & Awareness; Workplace Violence; Nuclear Security; Aviation Security; and Travel Security.

Howard J. Belfor, CPP

President

Belfor & Associates, LLC

Asheville, North Carolina

Howard J. Belfor, CPP, is President of Belfor & Associates, LLC, a consultancy specializing in serving the security industry, providing services to commercial, industrial and governmental clients and security product and service companies.

Howard is an ASIS Council Vice President assigned as liaison to the ASIS International Marketing group as well as a member of the Security Technology Group. He is former Chair of the Physical Security Council. Howard works directly with three ASIS Councils: The Crime and Loss Prevention Council, Commercial Real Estate Council, and the Security Architecture & Engineering Council. He is also a member of the ASIS International Certificate Programs Committee.

A frequent speaker at seminars and education sessions on topics associated with security controls and their application, he is also an ASIS faculty member and a subject matter expert in the areas of access controls, intrusion detection, surveillance, security management systems and auditing. Howard has been an ASIS Member since May 1981.

W. Douglas Fitzgerald, CPP, CFE, CSE

President/CEO

Fitzgerald Technology Group

Washington, DC

W. Douglas Fitzgerald, CPP, CFE, CSE, is a nationally recognized leader in the design and integration of security, life safety, data network and communications systems. His innovative approach and solutions have earned him accolades as a security and countermeasures planner. Mr. Fitzgerald's extensive background of securing American embassies around the world and implementing anti-terrorism and counter-terrorism protection in government facilities nationally and internationally provides him an understanding of security issues on a global level.

Mr. Fitzgerald is unrivaled in his ability to match the appropriate available technology with the degree of sophistication needed by the client. During planning and design, he is constantly aware of initial capital costs, life cycle costs and operational impacts. He is involved in all aspects of the planning and designing of security and communications systems that include fully integrated secure teleconferencing systems, touchscreen graphic control systems, graphic human/machine interfaces, automated process controls, evidence presentation equipment and networks, intrusion detection and biometric access control, and access denial systems.

Mr. Fitzgerald shares his expertise with others in a wide range of venues. He is currently Vice Chairman of the ASIS International's Security Architecture and Engineering Council, a member of the Professional Certification Board, and a member of the Threat Advisory System Guideline Committee. He has produced and presented a number of continuing education courses for the University of Wisconsin-Madison and the University of Louisville. Mr. Fitzgerald is a sought after lecturer, presenting topics concerning security, counter terrorism and vulnerability assessments, electronic security design, countermeasures planning, and communications planning to professional groups nationwide.
