Security Convergence

Going for Gold

ASIS European Security Convergence/ESRM sub-committee

Definition of convergence

- Security convergence is an integrated view of security, irrespective of whether it touches physical or IT security.
- Cross-discipline and cross-functional
- Convergence avoids silos and eliminates blind spots and reduces risk

ASIS **International** European Convergence/ESRM Committee

Godfried Hendriks CPP
Dave Tyson CPP

Benefits from convergence

- Get the full picture of the risk landscape
- Improve and simplify communication
- Efficient cost allocation
- Reduction of overheads
- Act with one voice

- **CONCLUSION:** Improve protection of people, information and property across the firm: less reputational issues and competitive advantage

Achievements 2013

- Presenting at ASIS European Conference, Russian Chapter; IFSEC 2013 (JW & AJ);
- Italian Business Support Functions Conference. Milan: IAPD, ASIS, ISC(2). Commitment of EAPM to lead this work.
- Publications : Committee's Articles shared with Leading UK Universities and Security Training Institutes.- increasing interest in Convergence/ESRM especially from UBM and IFSEC Global.
- Award Nomination. Finalist in new ESRM award in line with ASIS International Strategy.
- Standards: CSO and Supply Chain Risk: Contribution to the content and process.

Action Plan 2013/2014

- Developing relationships with other associations. Further proposed conferences in Italy and plans to work with CIPD in UK with support from Filippo Abramo.
- One page lexicon on Convergence and ESRM
- Present at The Hague
- Create convergence tool
- Establish business cases on convergence
- Contribute to ASIS Standards process
- Develop further national Chapter work by members - using Convergence Slides.
- Speak at other European Security conferences eg. Transport Expo and IFSEC 2013/2014, Write Blogs, create videos.
