Citicus

Booth Number: D10

Citicus provides software that enables security and risk managers to measure, manage and report the risk for their physical sites and the IT systems and the suppliers that support these in a consistent and objective way. Deploying Citicus ONE gives asset 'owners' insights into the risk status of their areas of responsibility, and tools to drive risk down. It also provides top management with a converged view of the risk and compliance status of their critical operational assets and processes. Citicus ONE is currently in use in public and private-sector organisations of all sizes, who appreciate its scalability, business-orientation and efficiency.

Simon Oxley Managing Director

Darktrace Limited

Booth Number: D4

Named Technology Pioneer by The World Economic Forum 2015, Darktrace is one of the world's leading cyber threat defence companies. Its Enterprise Immune System technology detects previously unidentified threats in real time, powered by machine learning and mathematics which analyse the behaviour of every device, user and network within an organisation. Some of the world's largest corporations rely on Darktrace's self-learning appliance in sectors including energy and utilities, financial services, telecommunications, healthcare, manufacturing, retail and transportation. The company was founded in 2013 by leading machine learning specialists and government intelligence experts, and is headquartered in Cambridge, UK and San Francisco.

FASTCOM with SMACS Multi-Flux Anti-Tailgating

Booth Number: C3

SMACS solutions, by Fastcom Technology, are the solutions for high-performance and flexible anti-tailgating. SMACS are the natural complement to any identification system such as ID cards or biometrics. SMACS integrate easily in your infrastructure, without major construction costs. SMACS are able to adapt to the business requirements. For instance, in parallel to high security anti-tailgating, SMACS can manage the flow of material and adapt itself to disabled people. Many renowned companies around the world are using SMACS to ensure their security. Typical applications are in datacentres, secure production zones, airports, R&D facilities and company headquarters. Today, more than 1 million passages per month are secured by SMACS.
