CSO Influence: Adding Value Across the Enterprise

2019 Sponsorship Prospectus

Integrating Security Into the Business

The role of today's Chief Security Officer is changing in extraordinary ways. In fact, the most successful organizations value the role as a key strategic partner and a vital component of business planning.

In addition to assessing risk across the enterprise and supply chain, it is essential for the CSO to engage and advise executive leaders on best practices and SOPs for business continuity and strategic leadership in all disciplines.

Produced by ASIS International's CSO Center for Leadership and Development, the 12th Annual CSO Summit unites leading security executives from the largest and most influential organizations for three days of intensive idea sharing, problem solving, and relationship building.

"Last year, through its focus on change drivers and emotional intelligence, the CSO Summit cemented itself as the premier event for security executives committed to becoming their organization's trusted risk advisor. As security related issues become more pervasive in business, the 2019 Summit expands the vista by bringing the voices of legal, financial, operational, and other executives to the discussion."
